EXPERIMENT 4

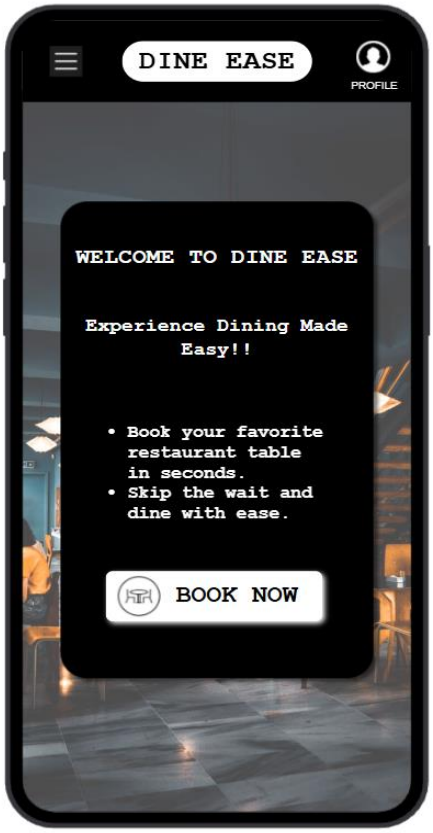
ROLL NO: 240701020

NAME: ADITYA S

USER INTERFACE DESIGN

Create a prototype with familiar and unfamiliar navigation elements. Evaluate ease of use with different user groups using Proto.io.

SCREEN 1:



Landing Page – Welcome Screen (DINE EASE)

Description:

The landing page welcomes the user to the DINE EASE restaurant table booking app.
It introduces the purpose of the application and provides a clear call-to-action for booking a table.

The screen contains a welcome message, brief description of the service, and a “Book Now” button to proceed to restaurant selection.

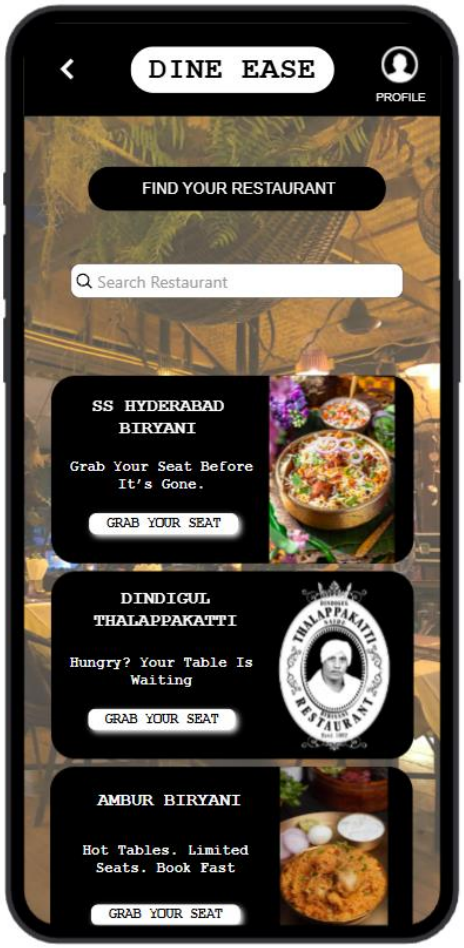
Familiar Navigation Elements:

1. **Hamburger Menu (☰) – Top Left Corner**
   - A widely recognized navigation icon used in most mobile applications.
   - Clicking it opens a side menu containing additional options such as Home, Profile, or Settings.
2. **Profile Icon (👤) – Top Right Corner**
   - A common icon representing the user’s account or profile section.
   - Clicking it navigates to the profile page.
3. **Call-to-Action Button (“Book Now”)**
   - A standard CTA button used in booking and e-commerce applications.
   - Clicking it takes the user to the restaurant selection screen.

Possibly Unfamiliar Elements:

1. **Custom Seat/Table Icon inside the “Book Now” Button**
   - Represents restaurant table reservation visually.
   - While meaningful, it may not be instantly recognizable without the accompanying text label.

SCREEN 2:



Home Page – Find Your Restaurant

Description:

The Home Page displays a list of available restaurants for table booking.
Users can search for restaurants and directly proceed to reserve seats using the provided call-to-action buttons.

The screen includes a search bar, restaurant cards with images, and booking options.

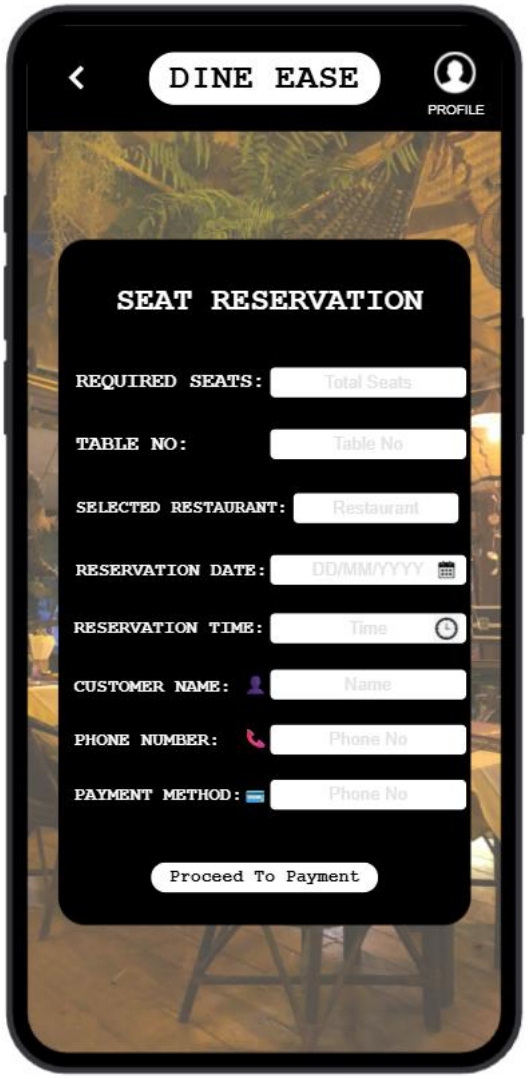
Familiar Navigation Elements:

1. **Back Arrow (←) – Top Left Corner**
   - A widely recognized navigation icon.
   - Clicking it returns the user to the previous screen.
2. **Profile Icon ( ) – Top Right Corner**
   - Represents the user account section.

- Clicking it navigates to the profile page.

3. **Search Icon (🔍) – Inside Search Bar**
   - A common icon used for searching content within applications.
   - Allows users to search for specific restaurants.
4. **Call-to-Action Buttons ("Grab Your Seat")**
   - Standard CTA buttons used in booking applications.
   - Clicking them navigates to the Seat Reservation page.

SCREEN 3:



Seat Reservation Page

Description:

The Seat Reservation page allows users to enter all necessary details required to book a restaurant table.
This screen collects reservation information such as number of seats, selected restaurant, date, time, and customer contact details before proceeding to payment.

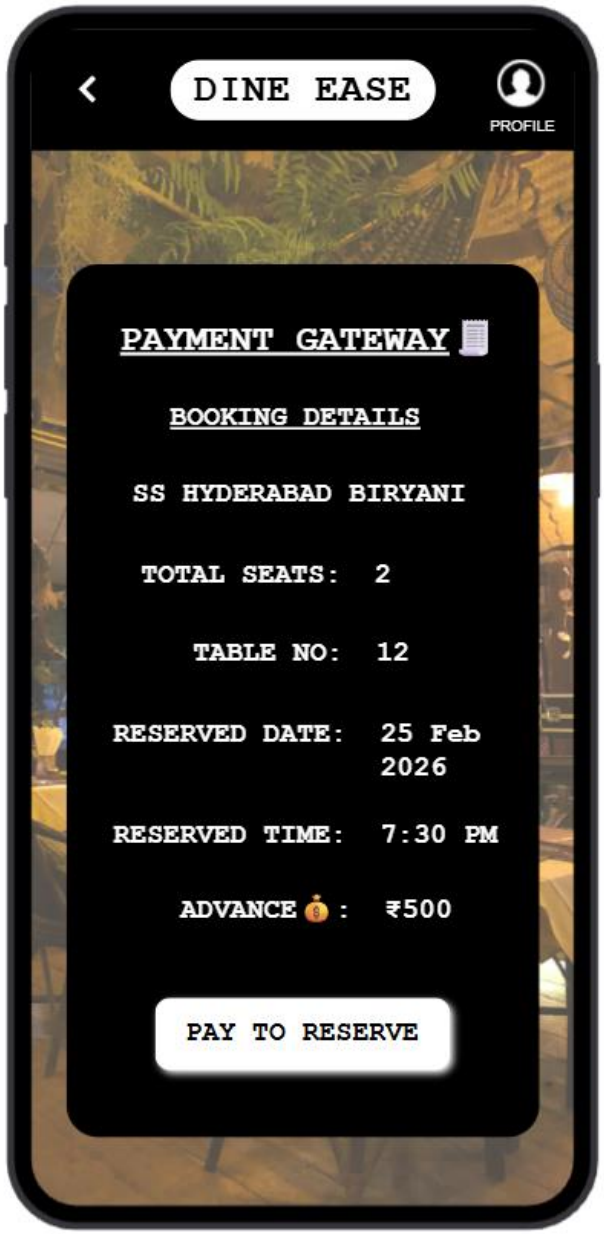
Familiar Navigation Elements:

1. **Back Arrow (←) – Top Left Corner**
   - A widely recognized navigation icon used across mobile applications.
   - Clicking it navigates the user back to the Home Page.
2. **Calendar Icon ( ) – Reservation Date Field**
   - A standard icon used to indicate date selection.
   - Helps users choose the desired reservation date.
3. **Clock Icon ( ) – Reservation Time Field**
   - Commonly used to represent time selection.
   - Allows users to select preferred dining time.
4. **Person Icon ( ) – Customer Name Field**
   - Represents user identity.
   - Helps users easily identify where to enter their name.
5. **Phone Icon ( ) – Phone Number Field**
   - A familiar icon indicating contact information.
   - Used to collect the user's phone number for booking confirmation.
6. **Call-to-Action Button ("Proceed to Payment")**
   - A standard CTA button used in booking and transaction flows.
   - Clicking it navigates the user to the Payment Gateway page.

Possibly Unfamiliar Elements:

1. **Custom Seat Selection Field ("Required Seats")**
   - Represents the number of seats required for reservation.
   - Some users may need text labels to clearly understand its function.
2. **Custom Payment Method Icon**
   - Indicates the selected payment option visually.
   - May not be immediately recognized without accompanying text.

SCREEN 4:



Payment Gateway Page

Description:

The Payment Gateway page displays the booking summary and allows the user to complete the advance payment to confirm the reservation.
It shows restaurant details, total seats, table number, reserved date and time, and the payment amount before proceeding with the transaction.

This screen ensures transparency before payment confirmation.

Familiar Navigation Elements:

1. **Back Arrow (←) – Top Left Corner**
   - A widely recognized navigation icon.
   - Clicking it returns the user to the Seat Reservation page.
2. **Receipt / Booking Details Icon (□) – Near Title**
   - Represents billing or booking summary information.
   - Helps users identify this section as payment-related.
3. **Money Icon (💰) – Near Advance Amount**
   - Indicates payment amount clearly.
   - A commonly used financial symbol.
4. **"Pay to Reserve" Button – Bottom Section**
   - A standard call-to-action (CTA) button used in payment processes.
   - Clicking it proceeds to the payment confirmation screen.

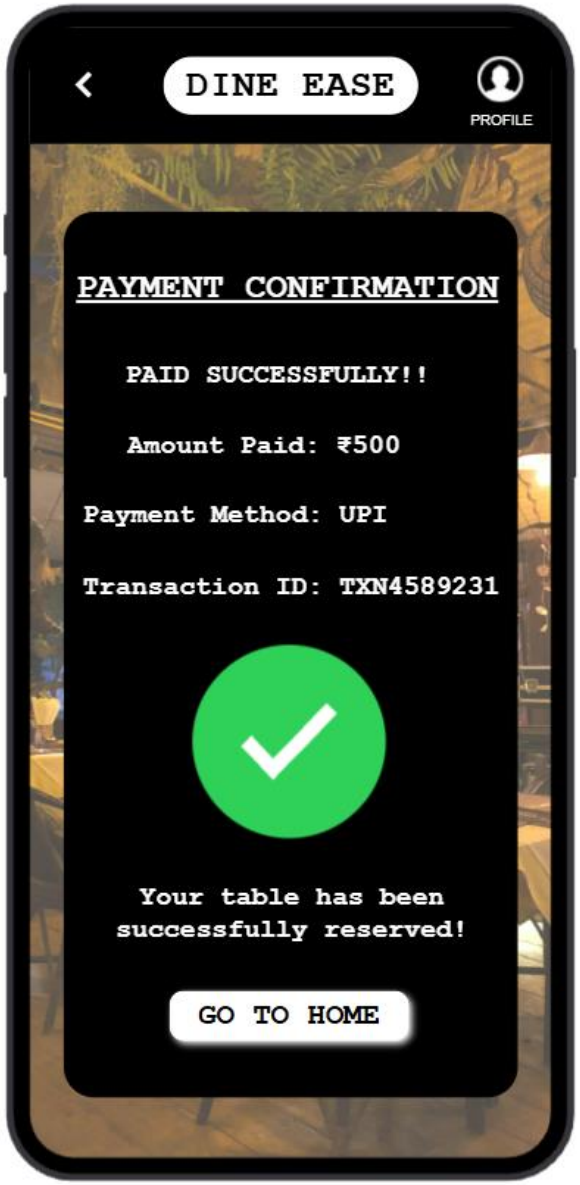
Possibly Unfamiliar Elements:

1. **Custom Booking Summary Layout**
   - The structured summary displayed inside a dark card is a custom UI design.
   - Some users may take a moment to understand the hierarchy of information.
2. **Advance Payment Concept**
   - The idea of paying an advance amount to confirm booking may not be familiar to all user groups.

Ease of Use Evaluation:

- Displaying booking details before payment improves user confidence.
- The clear amount (₹500) reduces ambiguity.
- The "Pay to Reserve" button provides a strong and direct action for completing the transaction.

SCREEN 5:



Payment Confirmation Page

Description:

The Payment Confirmation page is displayed after a successful transaction.
It confirms that the table has been successfully reserved and provides booking and payment details for user reference.

This screen reassures the user that the reservation process is complete.

Familiar Navigation Elements:

1. **Back Arrow (←) – Top Left Corner**
   - A commonly used navigation icon in mobile applications.
   - Clicking it allows the user to return to the previous screen.
2. **Success Checkmark Icon (✔) – Center of Screen**
   - A universally recognized symbol indicating success.
   - Instantly communicates that the payment and reservation were completed successfully.
3. **"Go to Home" Button**
   - A standard call-to-action button.
   - Clicking it redirects the user to the Home page.

Possibly Unfamiliar Elements:

1. **Transaction ID Display**
   - Shows a unique reference number for the payment.
   - Some users may not immediately understand its purpose without explanation.
2. **Structured Booking Summary Layout**
   - The organized display of restaurant name, date, time, seats, and payment amount is a custom design structure.
   - Requires clear labeling to ensure user understanding.

Ease of Use Evaluation:

- The green checkmark immediately signals success, reducing user anxiety after payment.
- Displaying booking details increases trust and transparency.
- The clear "Go to Home" button provides a simple next step for the user.
